## New City Primary School Year group: 5 Summer Term 2024

This term we are doing some very interesting and exciting things. We are keen to encourage parents and carers to help in their child's learning at home and as such we are providing you with this overview of what we shall be teaching at school. We also value any resources that you can contribute related to any of our topics. We also ask you to help us by making sure that all homework is completed. If you have any queries please feel free to have a chat with us.

also ask you to help us by making sure that all homework is completed. If you have any queries please feel free to have a chat with us.  Science		
English	Maths	Science
In English, the children will explore Shakespearian	In maths, the children will explore shapes and their	In science, the children will be learning about states of
literature by reading and analysing Macbeth. The	properties by drawing polygons and finding missing	matter and forces. They will be learning about different
children will explore the features of language and	angles, linking to algebra. They will also learn about	types of states of matter and investigate how solids can
create their own narratives and playscripts. We will	positional direction, reflection and translation. Later	become liquids and liquids can become a gas form. To
